March 10, 2018

Dear San Martin Neighbor:

On January 8th and on February 20th, 2017 a sewer spill occurred at 12690 Harding Ave in San Martin. Wastewater from the spill entered the West Branch of Llagas Creek and flowed south through the San Martin area. As a precautionary measure the City of Morgan is offering to test drinking water wells found in the area affected by the spill. The City will also collect soil samples from areas subject to flooding if requested. The City has identified your well as being in the affected area. The City will collect samples and test for bacterial contamination using a third-party laboratory: Alpha Analytical Laboratories. If you would like the City to test your well, please contact:

Dan Repp, Deputy Director of Utilities
Phone: 408-310-4166
Email: dan.repp@morganhill.ca.gov

Mr. Repp will discuss the sampling process and schedule the Laboratory visit with you. He will also coordinate access to your property.

We apologize for the inconvenience this may cause you.

Sincerely,

Karl Bjarke, Director of Engineering and Utilities
City of Morgan Hill
