The purpose of an Environmental Impact Report is to inform decision-makers and the general public of the environmental impacts of a proposed project that an agency (in this case, the City of Morgan Hill) may implement or approve. The EIR process is intended to: (1) provide information sufficient to evaluate a project and its potential for significant impacts on the environment; (2) examine methods (e.g., project-specific mitigations, uniformly applied development regulations) for avoiding or reducing significant impacts; and (3) consider alternatives to the proposed project.

### **PROJECT LOCATION**

The project site is located at the intersection of Juan Hernandez Drive and Barrett Avenue in the City of Morgan Hill, California. The majority of the approximately 9.61-acre project site is currently undeveloped and contains non-native grasses. Two medical office buildings totaling 15,900 square feet (sf), as well as a paved surface parking lot and landscaping trees, occur on a 1.69-acre portion of the project site. The City of Morgan Hill General Plan designates the project site Mixed Use Flex, and the site is zoned Mixed-Use Flex (MU-F) with a Planned Development (PD) Combining District overlay.

### **PROPOSED PROJECT**

The proposed project consists of a request to amend an adopted PD Master Plan to allow an increase in medical office square footage within the 9.61-acre project site. The proposed project would result in a net increase of 150,500 sf of medical/commercial uses relative to the originally approved project. After accounting for the existing 15,900 sf of medical office use that would be demolished, the total net increase would be 133,600 sf. The development would generally include three new medical office buildings, a six-story, 65-foot-tall parking structure with 965 parking spaces, additional surface parking, and installation of utilities.

All significant impacts identified in the SEIR can be eliminated or reduced to a less-than-significant level by mitigations imposed by the City. The final determination of the significance of impacts and the feasibility of mitigation measures would be made by the City as part of the City's certification action.

Pursuant to CEQA Guidelines Section 15087(c)(6), the subject site is **not** listed on any of the lists of sites compiled under Section 65962.5 of the Government Code concerning hazardous waste or hazardous waste disposal.
